LET'S GO BACK TO SCHOOL – ADOPT A SMILE

The earthquake that is continuously hitting the provinces of Ferrara, Bologna, Modena has damaged more than 60 schools so far.

More than a thousand children from 0 to 6 years old are now living in the tent camp and can no longer attend their schools.

Fp Cgil and its local branch, Fp Cgil Emilia-Romagna have decided to give an economic contribution to support specific projects to help the earthquake victims.

In this context was born the project "Scuola ed Educazione in campo", with the precise purpose of obtaining physical spaces where to restore the normal educational activity for the children, providing them the psychological support they need under the current circumstances, and give a chance to workers to resume, where possible, their job.
