

# **Unions work with employers on joint emergency plan for care sector**

 [Spain](#)

The FeSP-UGT public service federations and two federations from the CCOO confederation have joined with the Aeste and Asade employer organisations to draft an emergency plan for residential and home care services. The objective is to prevent any recurrence of the massive impact of COVID-19 on the sector both in terms of service users and workers. The unions and employers underline the role of government and the importance of increased funding, noting that the sector has seen EUR 5.9 billion worth of cuts since 2012. The joint plan emphasises the importance of applying collective agreements and securing better pay and working conditions for the 500000+ mainly women workers in the sector.
