

# **ETUC wants action on social dumping**

## [Europe](#)

Following a meeting with the French president over the summer, ETUC general secretary Luca Visentini is to meet French labour minister Muriel Pénicaud to discuss possible revisions to the Posted Workers Directive. This is an important piece of legislation that needs revision to ensure it is more effective in protecting the pay and conditions of workers who are on temporary assignments in other EU countries. The ETUC wants to see a guarantee of same salary for the same work in the same place and full entitlement of posted workers to all pay and conditions in collective agreements. Along with reforms to the directive the ETUC also wants to see action to regulate letterbox companies and to increase the resources available to labour inspectorates.
