

# **Unions resist attacks on rights and attempts to seize property**

 [Ukraine](#)

Trade unions across the country are working together to resist state interference in trade union affairs and attempts to take over trade union property including offices and training centres. The latest incident occurred in the Zarpattia region in the west of the country where trade union activists from different sectors gathered at the entrance to the offices of the regional trade union council to physically resist attempts to take over the building by the authorities.
