

Energy workers get 5.6% pay increase

 [Germany](#)

The fourth round of bargaining at the Uniper energy company ended with the signing of a new two-year agreement backdated to 1 January 2019. The 5000 employees will get an initial increase of 2.4% followed by a further 3.2% in December. Apprentice payments will increase by 15.5%. Energy union ver.di is pleased with the deal which it says would not have been possible without the mobilisation of workers and warning strikes.
