

School strike suspended

 [Poland](#)

After three weeks the national strike by school staff has been suspended but the ZNP teachers' union is determined to maintain its campaign for more funding for education and better pay for teachers and other school workers. The union says that the first stage of the strike was a success in putting education at the centre of the national debate and highlighting the low levels of pay across the sector. While the union has secured a 10% pay increase it remains committed to higher pay as well as aiming for major reforms of the education system and getting a commitment to increased funding.
