

Confederation calls for new approach to public sector pay

 [Poland](#)

In response to a new government development strategy, the OPZZ trade union confederation has emphasised the need to ensure decent pay in the public services and has expressed concern about government proposals to freeze public sector pay in 2021. OPZZ argues that current levels of pay fail to make the public sector attractive to new recruits and there are problems with fluctuating employment levels while workers face increasing responsibilities and workloads. The confederation underlines the link between quality services and quality employment and the important of effective tax, legal, health and other services as a basis for an innovative and competitive economy. It is calling for a new approach to determining public sector pay with a possible link to economic growth.
