

Unions join in international call to support culture workers

 [France](#)  [Italy](#)  [U.K.](#)

Three trade unions (CGT, FP-CGIL and PCS) representing workers in cultural services in France, Italy and the UK have come together to highlight the urgent need for action to support the sector and tackle poor pay and employment conditions. They argue that the sector has been particularly hard hit by measures to tackle the pandemic and these have been intensified because of the extent of outsourcing and precarious employment. The unions are calling for a strengthening of public culture services, decent and secure employment conditions and action to stop privatisation and outsourcing.
