

Energy unions address restructuring threat

[Italy](#)

Four energy trade union in France organised another day of action on 17 December in protest at what they see as major threats to the sector, such as the “Hercule” restructuring plans at EDF, and its public service mission. FNME-CGT, CFE-CGC Énergies, FO Énergie et Mines and FCE-CFDT are concerned that key decisions about the sector are being taken without proper consultation both with the unions and in parliament. Meanwhile, the Filctem-Cgil, Flaei-Cisl and Uiltec energy unions in Italy achieved a significant victory in the ENEL company following a campaign of industrial action. The unions have now secured a commitment to stop a planned restructuring project, end outsourcing, establish a new industrial relations agreement and take on 900 workers over the next three years.
