

# Collective agreements updated covering social services and public services

## [Lithuania](#)

Trade unions have negotiated improvements for workers in social services and public services. The new collective agreement in social services will see minimum monthly pay increased significantly from €642 to €730 while working hours will be cut by one hour a week. Trade union members covered by the agreement will get an extra day's leave after 10 years' service. Meanwhile, across public services there will be a 2.2% increase in the basis salary on which specific salary amounts are calculated. Trade union members covered by the collective agreements will get two additional days' leave for educational purposes. This means that workers can take up to 10 days' educational leave on average pay or five days to improve their health.
