

# Surveying the impact of digitalisation - take part in the survey

## Europe

EPSU is involved in an eight-country project ([digiqualepub](#)) that is looking at the impact of digitalisation on public services and public service workers with a focus on public administration, health and electricity. The eight countries covered are: Denmark, Finland, France, Germany, Hungary, Italy, Poland and Spain. If you are from these countries then you can participate in the survey and encourage your members and other workers to complete the questionnaire which is available in all eight languages on the project website.
