

## **Waste workers take 48-hour action**

 [Portugal](#)

The [STAL](#) municipal service union organised a two-day strike across the FCC Environment waste group on 15-16 August. The union says that the company is refusing to negotiate on pay, claiming that its financial situation prevents it from offering a pay increase to workers. The union says that urgent action is needed to tackle low pay and the impact of inflation and wants to see a minimum monthly increase of €90, along with negotiations on better working conditions and health and safety and a consistent approach across the whole company.
