

Report sets out telework arrangements across Europe

Europe

As European trade unions and employers gear up for the cross-sector negotiations on telework that are set to begin next month, the [Eurofound](#) research agency has published a new report that maps and analyses legislation and collective bargaining on telework in the 27 Member States and Norway. It covers the main differences and similarities in telework legislation and notes recent changes to these regulations. The report reveals some of the challenges of telework in relation to access, flexible working time, continuous availability/connectivity, isolation, occupational and health risk prevention and the costs incurred by the employee while working remotely.
