

Federations protest over chambers of commerce restructuring

 [Italy](#)

(August 2016) The public service federations - Fp Cgil, Cisl Fp and Uil Fpl - have sent a letter to the ministers of public administration and economic development protesting at the planned restructuring of the system of chambers of commerce. The unions argue that the plans to reorganise are going ahead without any guarantees for the employees and with the government refusing even to discuss the restructuring with the trade unions. The chambers employ around 7000 workers directly with 3000 in related bodies. The unions plan to organise a national demonstration in September. Read more at [Fp-Cgil \(IT\)](#).
