

Final result of study delivered - large interest to meet

(9 October 2012) Based on the results of the questionnaires a large number of organisations have indicated they are interested to exchange information and learn from each others' experiences. The results were presented by ConsultingEuropa and will be considered at a conference 15 November 2012. The conference will bring together employers, trade unions and representatives of skills councils, employment observatories and related organisations. The survey also indicated that there are considerable challenges for the sector including the impact of renewables.

The meeting took place on 8 October 2012, in Brussels. For EPSU the Deputy General Secretary took part.
