

# **Skills Qualifications and Labour market research for the the electricity sector - mapping project**

The European Social partners for the electricity sector are undertaking a project to explore which bodies are active in determining skills and qualifications at national or regional level as well as which organisations and institutions are involved in labour market research that predicts employment developments for the electricity sector. We also explore how the social partners are involved. We expect to bring representatives of such bodies together on 15 November. (This is an open meeting and you are kindly invited) It allows us to explore if there is an interest to take a next step and create a European level Skills Council that will provide the social partners with the capacity to consider developments in the electricity sector and take the necessary steps.

The deadline for responses to the survey is: 16 May 2012
