

Report reveals worsening labour market trends

 [Netherlands](#)

(June 2017) A new report from the CBS statistics office highlights three key trends in the labour market reflecting greater inequality and less security. Overall the percentage of workers on permanent contracts has fallen from 71% to 61% while the labour market is becoming more divided between low-paid, low-skilled jobs and high-paid work, with few jobs in the middle. The report also found more young people and those with basic education are stuck in low-paid jobs with little autonomy or security.
