

Unions set to mobilise over failure to implement agreement

 [Spain](#)

The FSC-CCOO and FeSP-UGT public service federations say they will organise action in September unless there is progress in implementing a key agreement covering workers in the state administration. The unions say that two months after signing the agreement no progress has been made in attributing occupations to the new pay structure and so there is a delay in paying workers their new salaries and any back pay. The FeSP-UGT also raises concerns about the failure to fully implement other agreements covering state workers, including ones on additional funds, mobility and temporary work.
