

Success for Hungarian electricity union

65-95% of employees in the electric energy industry took part in the strike throughout Hungary and carried out the planned 200 Megawatt reduction in electricity production.

Rezső Gál, the President EPSU affiliate VdSzSz writes: We have managed to come to an agreement with the government as a result of your solidarity expressed in many letters and with the strike. You can find brief information about the agreement in the attachment. I personally, as well as on behalf of our Trade Union Federation, the employees and pensioners in the electric energy industry, would like to thank you gratefully for the speedy and effective support you provided with your letters of solidarity.
