

Latest employment analysis from the European Commission

 [Europe](#)

The European Commission has published its annual review of Employment and Social Developments which has a focus on intergenerational issues. The review notes the slow decline in unemployment but underlines that there remain major problems in some countries around youth unemployment while young workers in employment are more likely to face precarious employment conditions. At the other end of the age spectrum the Commission continues to focus on trends to higher effective retirement ages and the need, as it sees it, to increase retirement ages.
