

Pay deal for civil servants below inflation

 [Türkiye](#)

Civil servants this year will see pay rise by 8% for the first six months with a further 4% for the second six months. Workers on less than TL 3500 (EUR 555) a month will get an additional TL 150 (EUR 25). Not all public sector trade unions are happy with the outcome as inflation is currently running at 16.7%. Pay in 2020 is set to increase in two instalments of 3%, although this could be increased if inflation is higher.
