

Union turns spotlight on cleaners

 [Sweden](#)

(April 2017) Beginning this month the municipal services union Kommunal will be investigating the employment and working conditions of cleaners, looking at their employment status, working hours as well as health and safety problems. The union will carry out a survey as well as making workplace visits to talk to workers and assess how they are affected by what are often seen as the main problems facing the sector - the impact of privatisation, lack of control over work - but also good examples where workers do have more control over working time and other working conditions.
