

Federations call for action on staffing and pay in the elder care sector

[Spain](#)

The Sanidad-CCOO and FeSP-UGT public service federations have called for a range of actions in the elder care sector in the wake of the COVID-19 crisis. Both federations were already campaigning to secure better pay and conditions for the workforce, 90% of which are women. They both argue that the impact of the pandemic has further exposed the fundamental problems of low pay, inadequate staffing, stress, excessive workloads. These have been compounded by the lack of personal protective equipment and inadequate testing which have exposed both workers and service users to the virus. Key union demands include an audit of care homes, higher pay and increased staffing, more funding from central government and a greater role for the public sector.
