

# **Unions plan series of actions over pay and collective bargaining**

 [Spain](#)

(May 2017) The public sector federations of the CCOO and UGT unions are planning a series of actions in protest at the government's failure to engage in a proper process of collective bargaining in the state administration. The unions want to see a number of major issues addressed including the loss of purchasing power of public employees, the threat to services from job cuts and privatisation and the restoration of other rights reduced as a result of austerity measures. The first action is planned for 1 June with a demonstration outside the directorate of public service.
