

Unions agree wage increase for hospital workers

 [Norway](#)

Health workers employed by hospitals covered by the Spekter employers' organisation will see pay increases of between 3.5% and 5%. The lower pay grades will get a NOK 16000 (EUR 1670) increase and this will take the minimum wage on the pay scale to NOK 314000 (EUR 32740). Other workers will generally get a 3.5% increase although there are higher increases for certain senior and management positions. The unions negotiating the deal say this agreement reflects the general pay trends across the economy.
