

# **ETUC sets out collective bargaining priorities**

## [Europe](#)

The ETUC has published the priorities for its Collective Bargaining and Wages Coordination Committee. These cover four main areas - (re)building and enhancing collective bargaining; pursuing upward wage and social convergence; combating in-work poverty, particularly through increasing wages for the lower paid; and increasing solidarity and reducing inequalities. The detailed policy document sets out how the ETUC will follow up on its Pay Rise campaign and includes provisions for a two-year project where the ETUC will aim to support initiatives at national level to boost sector-level bargaining.
