

Union consults over hospital pay deal

 [Germany](#)

After a series of warning strikes involving over 3000 workers, public service union ver.di has negotiated a new 28-month agreement covering 28000 employees of four university clinics in the Baden-Württemberg region. The deal is worth 7.1% paid in two stages (1 November 2019 and 1 February 2020). As a result of legislation that provides funding to ensure increased staffing of nursing and care personnel, these workers will get an extra EUR 200 a month. But ver.di has negotiated with the four hospitals to cover more occupations than those specified in the law.
