

Unions petition campaign success

 [Spain](#)

The UGT and CCOO trade union confederations continue their campaign against the public sector pay cuts and labour law reforms. The unions have successfully collected over a million signatures in support of a popular legal initiative to challenge the labour law reforms. The unions point out that the reforms including changes to collective bargaining have neither calmed the financial markets nor done anything to prevent the increase in unemployment. The unions have also been pursuing legal action in the courts to get the public sector pay cuts reversed but the latest stage of this process has not been successful with the Constitutional Tribunal ruling that the pay cuts are not unconstitutional.
