

ETUC reacts to Commission recommendations on wages

 [Europe](#)

The European Commission issued its country specific recommendations on 2 June with 11 countries being urged to reform their wage setting, minimum wage or collective bargaining system in some way. In a statement from its collective bargaining committee the ETUC has again called on the Commission to recognise the important role that wages play in the economy and, particularly in the current climate, to acknowledge that a boost in wages across Europe would contribute to an economic recovery and reduce the threat of deflation.
