

Public service strike set for 22 April

 [Belgium](#)

The CGSP/ACOD public service federation (part of the FGTB confederation) has called a national strike in the public services in protest at government policy. The unions is strongly opposed to the increase in pension age and other changes that reduce pension benefits. It is also protesting over the public sector pay freeze and policy of not replacing only one in five civil servants who leave. The union also wants to see an increase in public investment. The CSC has not taken a decision to strike on the same day but has sent a circular to its members to say they can join the stoppage if they want to.
