

Government fails to deliver on public employment and pay

 [Italy](#)

(October 2016) Despite promises of additional funding to cover public sector employment, the latest figures announced by the government are a major disappointment to all the public sector federations. FP-CGIL, CISL-FP, UIL-PA and UIL-FPL issued a joint statement that attacked the government for its short-sighted policies and failure to provide any opening for serious negotiations on pay, skills, productivity and innovation. The unions will be stepping up their mobilisation beginning with a national protest in Rome on 12 November.
