

Energy unions unite in day of action on pay

[France](#)

(March 2017) Five energy federations, including FNME-CGT, FNEM-FO, CFDT, CGC and CFE, organised a joint day of action and strikes on 14 March in their campaign to secure a pay increase as well as an end to restructuring and job cuts. The unions want to see an increase applied to the basic pay structure but employers in the sector have only been offering changes to other payments and have refused an increase on the basic salary which would guarantee a pay increase for all workers in the sector. EPSU sent a solidarity message.
