Pay and pensions rise by 2.4% net at European institutions

Staff in European institutions, bodies and agencies will get a net 2.4% increase in salaries, pensions, and social allowances backdated to 1 January 2022. This is the result of a formula that has been applied since the early 1980s, when EPSU affiliate, Union Syndicale Fédérale carried out successful industrial action, also defending the gains later through further industrial action. The salaries (and later also pensions) of staff have kept pace with the development in the purchasing power of civil servants working in the national governments of the Member States. This increase reflects the high inflation in the second half of 2021.
