

Union takes pay protest to parliament

 [Portugal](#)

The STAL local government union has organised a march and demonstration outside parliament for 23 October. The union wants the government to ensure that the 2021 budget includes funding for key measures on pay. The union has four main demands - a EUR 90 increase for all workers; implementation of an allowance for dangerous and arduous work; changes to the pay structure to abolish pay levels that fall below the national minimum wage; and reinstatement of compensation payments for accidents at work. The final point relates to compensation for permanent partial incapacity that was the victim of cuts imposed by the Troika after the last crisis. EPSU sent a message of solidarity.
