

Single market policy developments

(17 October 2011) ETUC and EPSU met Commissioner Barnier on 29 September to exchange views on upcoming policy initiatives on public procurement and concessions.

Discussions clarified a number of trade unions concerns over the impact of competitive tendering, the promotion of PPPs and the lack of a 'quality public services' perspective in current EU policy-making. A follow-up letter (attached below) from the meeting gives more details on these.
