

Calls for solidarity with sacked municipal workers

 [Türkiye](#)

Local government workers employed by the Aliğa Municipality in Izmir are being sacked without justification and the newly elected mayor is also forcing workers to resign from their union, Genel-İş, and to join another one. The number of dismissals reached 187 on July 24 and workers have been picketing since the 20 May, demanding reinstatement and respect for trade union rights and freedoms. Online support is being coordinated by the Labourstart campaigning organisation and promoted by EPSU and PSI.
