

Energy unions united in action against EDF restructuring

 [France](#)

The energy unions CGT, CFE CGC, CFDT and FO report massive support for their day of strike action on 19 September in protest at the Hercule project - plans for a major restructuring of the country's main energy company EDF. The unions have called on the government, the main shareholder in EDF, to block the project and they are planning further action from 10 October if there is no commitment from the company to withdraw the plans. EPSU organised demonstrations in Brussels in support of the strikers.
