

Nuclear energy union set up for lengthy protest

 [Ukraine](#)

The Atomprofspilka nuclear energy union organised a major demonstration outside the office of the Cabinet of Ministers on 4 December in protest at the failure of the government to address union demands for information about the strategy for the industry. The union is concerned about recent developments including the cancellation of projects that are creating doubts about jobs and the future development of the sector. Protests have also taken place in other key cities and camps set up where nuclear workers stay in tents when not at work to demonstrate their determination to get a reaction to their protests.
