

# **Health union makes key demands on government**

 [Ukraine](#)

The HWUU health workers' union met with the Ministry of Health to express its serious concerns about the situation facing health staff. It had five main demands for action in relation to provision of personal protective equipment (PPE); compulsory testing of medical professionals for COVID; remuneration (in case of emergency, overtime, etc.); insurance (to equate the work of workers in emergency conditions to the participants of hostilities); and the arrangements for commuting to work. The union has set up a hotline to support its members who face problems at work in relation to COVID-19.
