A demand for new skills

- Interprofessional skills and seamless care
- Up-to-date knowledge and skills in new technologies, blended learning, simulation and bed-site training
- Increased specialization and increased complexity of treatment and care
- Increased demands for user involvement and patient empowerment
- Knowledge and skills in patient involvement and communication
- New ways of collaboration, co-creation and relational skills
- Knowledge and skills in public health, health prevention and target groups with special needs
“Co-creation is vital”
“Patients as educators”
Short case
How to support neuro rehabilitation

"When patients are more involved in their own rehabilitation and when the communication with the professionals is clear, the patient is more likely to maintain the results of the physiotherapy achieved during hospitalization.”
