

Message of solidarity sent to the Greek unions that called the general strike on 12 November 2015

Dear Comrades,

On behalf of STAL's National Board, we offer our solidarity with your general strike on 12 November 2015.

Through you, we salute the Greek workers and reaffirm our solidarity with their struggle and resistance against the EC, ECB and IMF impositions.

We too have suffering the consequences of the economic governance and austerity, incompatible with the relaunch of the national economy, social and labour rights, national sovereignty and democracy itself.

We are convinced that it is worth fighting, as evidenced yesterday, by the approval in our parliament of a motion to reject the right-wing government.

Now there is the possibility of forming an alternative government, based on an agreement among the left parties, that includes the commitment of the gradual return of a set of labour and economic rights to the portuguese workers, especially to the public administration workers.

We send you our fraternal and solidarity embrace on the certainty that the struggle is the way for a Europe of workers and peoples where they can live with dignity, in peace and democracy. A Europe where all have place without loss of our rights and our sovereignty.

Dear comrades, we wish you a great success in your general strike tomorrow.

Fraternally and with the certainty that we are unconditionally at your side,

National Board of STAL

Francisco Braz

Lisbon, 11 November 2015
