

## Press Release

Assembled for a plenary meeting on 20 December 2007 as part of the consultation on the GDF/Suez merger plan and on the decision to put Suez Environnement on the stock exchange, Suez's European Consultative Committee (ECC) has had access to the latest information from the group's management:

- ◇ The obligation (due to tax administration) for shareholders in the pact to hold their Suez Environnement equity for at least three years;
- ◇ The publication of the Gaz de France privatisation decree;
- ◇ The agreement plan on social guarantees.

As a result of these latest developments, the ECC's members will consult their trade union committees and organisations on these issues, in order to draw up an advisory document which the ECC intends to submit on 7 January 2008.
