

EPSU: defending and promoting public services and public service workers - 9th Congress briefing

Campaigning for the right to water, negotiating on information and consultation rights for central government workers, lobbying for tougher action on tax avoidance and fraud, standing up to multinationals and defending dismissed or imprisoned trade unionists ... these are just some of the many activities of EPSU – the European trade union federation for public service workers. We mobilise for action and change. We influence the policies and decisions of employers, governments and European institutions, campaigning for well-funded public services and better rights at work. Our vision is of a Europe in which men and women and our environment are not exploited and with public services at its core. Good jobs in our sectors mean quality services for citizens.
