

MEPs commit to pressure European Parliament to investigate COVID-19 impact on long-term care

7 July 2020 – With a public statement, 88 MEPs from 6 political groups express their support to [the letter that EPSU, AGE and EDF](#) sent on 1 July urging the European Parliament to establish an inquiry into the impact of COVID-19 in long term care facilities across Europe.

“We, as Members of the European Parliament, believe that it is absolutely necessary to examine what happened at European level with all the means at our disposal, in order to have comprehensive data in front of us and to identify political and management responsibilities, so that we can change course immediately.

We are committed to ensuring that the European Parliament has the will and strength to discover and reconstruct what has happened, strengthen attention on these facilities, find alternatives of group housing and avoid other mistakes and tragedies.”
